

Usage Guidelines:

- Prepare master mix by combining supplied rapid hydrolysis buffer, internal standard, and enzyme solution.
- Add the master mix to the urine sample and mix solution.
- **DO NOT VORTEX.**
- Incubate at 50-60 °C.

Content and Storage Guidelines:

Enzyme Solution:

Purified enzyme solution contains trace levels of potassium phosphate and is stable at 2 - 8 °C for up to 12 months in its original sealed package. This product contains a patent pending buffer containing sodium azide (0.02%) for increased stability. **Do NOT freeze the enzyme solution.**

Rapid Hydrolysis Buffer:

Rapid Hydrolysis Buffer is sterile filtered and is to be used with the enzyme solution to obtain optimal pH. It is stable at 2-30 °C for up to 12 months in its original sealed package.

Product Sterility:

IMCS products undergo strict quality control to ensure product sterility. The product can become contaminated if mishandled. Follow aseptic technique to avoid contamination.
